

More and Better Designed National Public Support for Energy Technology Research and Innovation

Access to Risk Finance for Clean Energy Technologies Conference

25-27 May 2021

Financial Instruments to Enable the Clean Energy Transition

Objective: This conference will showcase the EU's funding and financing offer for energy demonstration projects, and give space to some private providers of finance to present their involvement in new energy technology.

Technology developers will deepen their understanding of these sources of capital. They will also have the possibility to connect with representatives of public and private finance organisations.

Financial providers, both public or private, will gain awareness of the energy community's needs and learn about projects that may be of interest as investment opportunities.

Targeted Audience: The conference will gather together 3 different stakeholder groups:

- The energy research community and companies
- Policy-makers in charge of R&I funding
- The private finance sector
